

Project Part 1

Team:

Siqi Chen

Yueming Cong

Yuhan Lin

Title:

Food Delivery

Description:

Usually the delivery driver works for one restaurant but not for other shops in a city. Food Delivery service website can organize drivers' time, give them reasonable schedules through calculating routes on the map which also marks locations of restaurants, orders and drivers, in order to make convenience for customers ordering meals on line.

Functionality:

Client:

Ordering from favorite restaurant

Browse menus from local restaurants

Submit order

Driver:

Organize schedules and time

Layout routes

Restaurant:

Expand popularity

Agile flow control
